

BEDDING SAND

MID HANTS

NATURAL MATERIALS

ADVANTAGES OF USING MID HANTS' BEDDING SAND

<ul style="list-style-type: none"> The pricing of bedding remains largely the same. It doesn't compete with the green energy sector. 	<ul style="list-style-type: none"> Bedding sand can be effectively used to create non-slip concrete passageways.
<ul style="list-style-type: none"> Our sand increases bed comfort, which helps to reduce livestock leg abrasions and swollen legs/ knees. 	<ul style="list-style-type: none"> Using bedding sand increases cattle-laying time. This leads to reduced lameness and increases your milk yields.
<ul style="list-style-type: none"> When you give your cattle better comfort, it will increase their longevity within the herd. 	<ul style="list-style-type: none"> The environment is improved for cattle and humans due to using a non-dusty bedding material.
<ul style="list-style-type: none"> Bedding sand is an excellent soil conditioner, and it can also be recycled and reused. 	<ul style="list-style-type: none"> You won't need to invest in expensive and dusty sterilising materials, which are more traditionally used in alternative cubicle systems.
<ul style="list-style-type: none"> Bedding sand is recommended as the best material to use in calving pens - due to it being both sterile and non-slip. 	<ul style="list-style-type: none"> Make sure you use bedding sand with low-levels of silt (<i>a high level of silt could be found in the wrong sea-sand or recycled sand</i>), and it shouldn't contain any gravelly-flint
